

Offer no.:

jetstream 2 plus

Thermoelectric (Peltier) **heating/cooling**, forced air circulation. **Microprocessor controlled**, up to 99 programmable temperatures, internal timer, temp. gradients, linear ramp calculation. Settable via numerical keypad with 2 line LCD display, (menu-driven operation)

double referenced temp. sensor technology

RS 232 connection-

Compartment size for 4 columns up to 40 cm length. ample space for injector, valves and precolumns.

leak detector with selectable sensitivity. automatic switch-off, audio alarm.

safety: continuous function monitoring, 2 independent sensors and fuzzy control software,

adjustable temp. lock for column-save,

autocalibration mode for GLP conform operation

Customer calibration possibility via keyboard

Temperature range: 5 - 85 °C standard

Stability: ± 0.02 C

Accuracy: ± 0.1 C

Reproducibility: +/- 0,1

Dimensions: 135(b) x 450 (h) x 510 (d)

Compartment: 90 x 390 x 47

jetstream 2 plus with injector: *

same as jetstream p/n 5470 with

Syringe loading Injector: Rheodyne 7725 i, installed

*if valve is available- mounting openings will be done free of charge
